

## ASPIRE RCB HYBRID CLICK FLOORING PROFILE FOR FLOATING INSTALL

ASPIRE RCB Hybrid flooring represents next generation manufacturing techniques utilising the recently developed rigid composite core board (RCB). RCB core is manufactured from inert mineral compounds that are stable and provide little or no movement; this enables excellent performance characteristics not commonly associated within the Luxury Vinyl Tile category.

The overall construction of the plank incorporates a robust water based PU coating for everyday scuff resistance. The 0.5 m wear layer and printed visual décor provide realistic timber textures and colours in both classic Australian timber species and with a contemporary colour palette to enhance our modern interiors. The planks also display a stabilising balance layer with an attached acoustic cross-linked IXPE foam layer that delivers excellent noise reduction capabilities.

This next generation Hybrid flooring is dimensionally stable, highly durable and interior waterproof providing instant appeal for modern housing, retail and commercial shop fitout.

ASPIRE Hybrid Super Width Plank Valinge Click 1800 x 223 x 6.5mm
